- New Look to Clarity HMIS
- Same Data Fields, New Feel
- Use the new interface today!

Preparing for...

HUD Data Standards

What are HUD Data Standards?

- A standardized way to collect data across HMIS systems about individuals and families experiencing homelessness.
- The data elements required in an HMIS to meet participation and reporting requirements established by HUD and the federal partners.
- Planning is underway!

Longitudinal System Analysis (LSA)

What is the The Longitudinal Systems Analysis (LSA)? The LSA report is a required HUD report that our community is required to submit annually to HUD across key projects participating in the Continuum of Care (CoC). It provides HUD and our CoC with critical information about people experiencing homelessness and their use of the system of care.

Universe of HMIS Data that will be submitted:

- Five project types (ES, SH, TH, RRH, PSH, PH)
- Exits two years prior to the reporting period
- Exits one year prior to the reporting period
- Exits in the first six months of the reporting period
- Client demographic and household data for all program enrollments
- Exit Destination, length of time homeless and returns to homelessness

Coordinated Entry – Clean up
